PDF Embedder Premium

Extra Premium features

Our PDF Embedder Premium plugin for WordPress provides a dynamic and elegant viewer for your website visitors, with added support for mobile devices.

Our plugins have a unique method for embedding PDFs, using Javascript only, and *not* using iframes or third-party services which can suffer outages. Upload PDFs and embed them straight into your site - just like adding images! PDFs will be automatically sized to their natural size and shape.

The PDF Embedder Premium version has extra features that are not available in the free version:

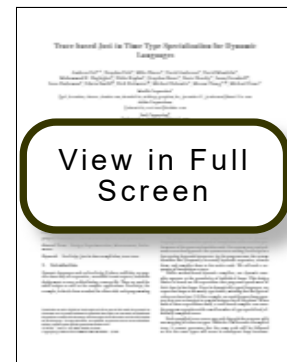

- Continuous scrolling between pages
- 'Download PDF' button allows users to obtain the PDF to read in their own choice of viewer
- Full screen button
- Fully functioning hyperlinks
- Jump straight to page by typing page number
- Track number of views and downloads
- Unbranded - no wp-pdf.com link

Mobile-friendly PDFs

Other document viewers are cumbersome for users with small screens - it is difficult to position the document entirely within the screen, and your users' fingers may catch the entire browser page when they're trying only to move about the document...

PDF Embedder Premium solves this problem with an intelligent 'full screen' mode. When the document is smaller than a certain width, the document displays only as a 'thumbnail' with a large 'View in Full Screen' button for the user to click when they want to study your document. This opens up the document so it has the full focus of the mobile browser, and the user can move about the document without hitting other parts of the web page by mistake. Click Exit to return to the regular web page.

Click 'View in Full Screen' on the phone image to the right hand side above to try it out!
